Summary

Full Stack Developer with 3+ years of experience specializing in React.js, Next.js, and modern web technologies. Proven track record of delivering 10+ custom applications and building scalable B2B platforms. Expertise in both frontend development and backend integration with strong focus on performance optimization and user experience.

Experience

Go2Stone — Dec 2022 - Present
Full Stack Developer — Remote

- Architected comprehensive B2B e-commerce platform using **Next.js, Laravel, shadcn and Material UI,** currently in pre-launch phase
- Transformed complex business requirements into intuitive, responsive interfaces optimizing user experience across all devices
- Implemented modern performance optimizations and UX solutions, establishing scalable architecture for future growth
- Maintained enterprise-level codebase following industry best practices and established development standards

Freelance — Jun 2022 - Present
Full Stack Developer

- Successfully delivered 10+ custom full-stack web applications using **Next.js, React.js, and modern tech stack** with average 2-month project timeline
- Built responsive, cross-platform interfaces using **ShadCN UI and TailwindCSS,** ensuring optimal user experience on all device
- Integrated complex APIs and real-time features using **Supabase and MongoDB,** enhancing application interactivity and scalability
- Achieved 100% on-time project delivery while maintaining high code quality standards aligned with client specifications

Çanakkale Onsekiz Mart University — Aug 2023
Computer Vision & Machine Learning Intern — Sep 2023

- Built and optimized Python-based image processing pipelines implementing Sobel and Canny algorithms for object detection and automated cropping
- Automated camera workflows for RGB/NIR capture and grid segmentation, streamlining dataset creation process by 60%.
- Applied and fine-tuned ML/DL models (SVM, Random Forest, VGG16, ResNet50) using GridSearchCV for hyperparameter optimization
- Designed and 3D-printed custom components, integrating them into machine vision system for agricultural image classification

Jotform — Aug 2022 - Sep 2022
Front End Developer Intern — Remote
🔗 https://www.jotform.com/

- Implemented new **flow diagram feature** for Jotform Approvals product, enhancing workflow visualization capabilities for enterprise users
- Collaborated with 6-person development team building React.js applications, utilizing Redux and Redux-Saga for state management
- Contributed to code reviews, bug fixes, and UI improvements, maintaining high-quality standards for production releases

  Tech: React.js, Redux.js, Redux-Saga, Git, GitHub

Projects

Petosfer — June 2025
🔗 https://petosfer.co

- Developed comprehensive pet care marketplace platform connecting pet owners with service providers across Turkey using Next.js 14, MongoDB, and Prisma
- Implemented **tiered subscription system** with Iyzico payment integration, supporting 11+ service categories from pet hotels to veterinary care
- Built **real-time messaging system** using **Pusher** for instant client-provider communication with metadata-rich conversations and booking details
- Architected **role-based multi-tenant architecture** (User/Host/Admin) with comprehensive **admin dashboard** featuring **moderation tools, analytics,** and **automated booking management**
- Integrated advanced features including **PWA** capabilities, **multi-language support** (TR/EN), **Google Maps location services,** and **Cloudinary** media management
- Created sophisticated **booking system** with calendar availability, **dynamic pricing models,** and **automated expiration** handling via cron jobs

Tech Stack: Next.js 14 (App Router), TypeScript, MongoDB, Prisma ORM, TanStack Query, Zustand, NextAuth.js, Iyzico Payments, Pusher, Cloudinary, shadcn/ui, Tailwind CSS, next-intl, PWA

Check out my portfolio site

Marmol Turco
🔗 https://marmolturco.com/en

- Architected multilingual e-commerce platform for premium marble supplier using **Next.js, Supabase, and NextAuth**
- Implemented CMS functionality with **Tiptap Editor** enabling dynamic content management and localized user journeys
- Built comprehensive admin interface supporting global shipping logistics and custom architectural consultation features

MRS
🔗 https://www.mrs.ws/en

- Developed robust full-stack solution showcasing advanced simulators and technology platforms using **Next.js and MongoDB**
- Implemented secure admin interface with multilingual support for global business users
- Created responsive showcase for cutting-edge products including **HURMOTION, VISIONSPHERE, and SIMVISION** platforms

Çınar Karavan
🔗 https://www.cinarkaravan.com/

- Built comprehensive e-commerce platform with admin panel and CMS using **Next.js, Supabase, and TailwindCSS**
- Implemented dynamic content management system for product categories including solar panels, lighting, and water systems
- Created streamlined inventory control system enabling real-time product updates and responsive user interactions

Gradient Guru
🔗 https://gradient-guru.vercel.app/

- Developed responsive web tool using Next.js and TailwindCSS enabling real-time CSS gradient creation with live preview
- Built intuitive interface providing copyable code output for developers and designers
- Implemented efficient gradient generation algorithms optimizing user workflow and development speed

---

Skills

Frontend

React.js, Next.js, TypeScript, TailwindCSS, Material UI, shadcn/ui

Backend

Node.js, Laravel, PHP, Supabase, MongoDB, PostgreSQL

Tools & Other

Git, GitHub, Redux, GraphQL, Prisma ORM, Auth.js, Sentry, Zustand, PostHog, PayloadCMS, NextAuth

---

Education

Canakkale Onsekiz Mart University — 2020 - 2024
Canakkale, TR — Bachelors's in Computer Science

Certifications

Next.js 15 & React - The Complete Guide
